About Me

Software Engineer and 2nd-year **BSc IT (Computer Science & Business Management)** student at the University of the Free State, passionate about **game development, web technologies, and software engineering**. I am skilled in various technologies, with growing interest and expertise in **cybersecurity** and **mechatronics**. I thrive on turning ideas into interactive, functional solutions, whether building immersive games, sleek websites, or impactful software. I am a collaborative and creative problem-solver, I aim to craft innovative tech that inspires, protects, and advances.
